ASSOCIAZIONE BAOBAB
TICINO

WHO ARE WE

We are an association of emotionally involved volunteers. Our aim is to help children in need by offering them the opportunity to attend school, provide them with all their needs, emotional support and a point of reference in the time to come. Our efforts are focused in the Malindi and Mambui zone in Kenya.

BAOBAB TICINO BECAUSE

We follow up with each of the kids personally and travel there about twice a year, and not at ABT's expense.

Every single donation that we receive always makes a difference regardless of the amount. There are also several long-distance adoption options available to everyone.

Water, food, education and health are everyone's rights, but in this country it's increasingly a luxury for the few. By cultivating the land and soon running a chicken coop, we employ local families nearby, helping them to survive.

Our aim is to make a difference in every life we touch, especially by empowering the future of children and young adults.

WHAT HAVE WE DONE SO FAR

- ✓ Purchased cows, goats, chickens, beds and mattresses...
- ✓ Guaranteed studies and covered the needs of the 27 children since 2017.
- ✓ We rescued the children by reuniting them with their families.
- ✓ Distributed food to needy families.
- ✓ Purchased land for agriculture. **2023 1st harvested 1000 kg of corn.**
- ✓ Started with university education for several girls and boys.
- ✓ Offer tutoring during school vacations.
- ✓ **Nov 2025 construction begins on new housing for ABT children**

ABT WAS FOUNDED ON THE 5 TH OF SEPTEMBER 2017

- ✓ Formed a team to start this adventure.
- ✓ The challenge to help children at risk of abuse and maltreatment starts.
- ✓ Seeking sponsors, donors and godparents who care for the well-being of the children the association supports and who believe in us.
- ✓ Finding volunteers for the different activities we do and making ourselves known.

OUR GOALS

Never give up.

- ✓ Continue to support the children and young adults in their studies and cover their needs and a medical service whenever necessary and providing medical care when required, transportation and more, 365 days a year.
- ✓ Accompany each one of them during their studies until they complete a vocational path, when it'll be possible, and give them the opportunity to live a healthy, dignified and economically independent life while remaining a point of reference for them in case of need.
- ✓ Create sources of support for self-sufficiency, such as starting agricultural projects, chicken coop, goat farm and house to live in.

They are the generation that can make a difference in their country.
